PROJECT PROPOSAL

Water Purifier Business Platform

Multi-App Ecosystem with Admin Panel, Customer App & Technician App

Prepared By	Sowsi Technologies Pvt Ltd
Contact	info@sowsitechnologies.com
Location	Hyderabad, Telangana
Validity	30 Days from Date of Issue

1. Executive Summary

This proposal outlines the development of a comprehensive digital platform for your water purifier business. The platform is designed to streamline your end-to-end operations — from product sales and AMC (Annual Maintenance Contracts) to technician dispatch, distribution management, and business reporting.

The platform comprises three core applications and one web-based admin panel, all connected through a single backend system:

Application	Purpose
Customer App (Android)	End customers book services, buy products, manage AMC & track technicians
Technician / Rider App (Android)	Field agents receive jobs, navigate to sites, collect payments & upload proof
Admin Panel (Web)	Full business control — stores, staff, inventory, commissions, reports & distribution

Store management is handled directly within the Admin Panel through a dedicated Store Module — giving your team a single place to manage all branch operations, stock levels, and technician assignments without requiring a separate store app.

2. Business Understanding

Your business operates as a water purifier sales and service company with the following distribution and service model:

Business Layer	Role
Direct Customers	Customers purchase purifiers and subscribe to AMC plans directly through your platform
Riders / Technicians	Agents who install, service, and sell purifiers on your behalf and earn commissions per job
Stores / Branches	Local distribution and service hubs managing stock and technician assignments
Admin / Business Owner	Centralized control of all operations, pricing, commissions, and reporting

Riders serve a dual role — they are both service technicians (installation & repair) and sales agents (earning commission on purifiers sold or AMC contracts closed). This commission-based model is fully supported within the platform.

3. Scope of Work

A. Customer App (Android)

The customer-facing Android app allows end users to interact with your business seamlessly.

Module	Key Features
Registration & Login	OTP-based mobile login, profile management
Product Purchase	Browse catalogue, add to cart, checkout with payment gateway
Service Booking	Book installation, repair, or filter replacement with date/time slot
AMC Subscription	Browse & subscribe to annual maintenance plans, renewal alerts
Technician Tracking	Live location of assigned technician, ETA display
Payment	Online & COD payment, digital receipts, payment history
Service History & Warranty	Past services, warranty status, filter change reminders
Offers & Promotions	Active deals, referral offers, push notifications
Support	Call, WhatsApp, and in-app support access

B. Technician / Rider App (Android)

Used by your field agents for job execution, payment collection, and commission tracking.

Module	Key Features
Login & Verification	Secure login with document verification during onboarding
Job Management	View assigned jobs, accept/reject, navigate to customer location
Service Workflow	Step-by-step install/repair checklist, before & after photo upload
Customer Signature	Digital signature capture on job completion
Payment Collection	COD collection, mark payment received, generate receipt
Earnings Dashboard	Daily/weekly earnings, commission breakdown, payout history
Navigation	In-app map navigation to customer address

Module	Key Features
Contact Directory	Quick access to store manager and admin contact details

C. Admin Panel (Web) — with Integrated Store Module

A comprehensive web-based control panel with role-based access, covering all business operations including a built-in Store Management module.

Module	Key Features
Master Dashboard	Business KPIs — revenue, active AMCs, open jobs, stock levels at a glance
Customer Management	View all customers, purchase history, AMC status, support logs
Store Management	Add/manage multiple stores, assign managers, view store-wise stock & sales
Inventory & Stock	Product catalogue, stock levels per store, low-stock alerts, stock transfers
Technician Management	Onboard riders, assign to stores, track job history & performance
Job & Service Management	View all service requests, assign/reassign technicians, status tracking
AMC & Pricing Plans	Create AMC tiers, set pricing, manage renewals and expirations
Commission Setup	Define commission rules per product/service, view payout reports
Reports & Analytics	Sales, revenue, technician performance, AMC renewals — exportable
Role-Based Access	Super Admin, Store Manager, Area Manager roles with permission control
Notifications & Promotions	Send push notifications, manage offers, promotional campaigns
Distribution Module	State/district level stock dispatch, distributor tracking, allocation reports

4. Technology Stack

Layer	Technology
Customer App	React Native (Android)

Layer	Technology
Technician App	React Native (Android)
Admin Panel	React.js (Web)
Backend API	Node.js with Express
Database	MongoDB / PostgreSQL
Real-time Features	Socket.io (live tracking, job notifications)
Payment Integration	Razorpay
Maps & Navigation	Google Maps API
Push Notifications	Firebase Cloud Messaging (FCM)
Cloud Hosting	AWS / DigitalOcean (client responsibility)

5. Investment Summary

The following investment breakdown covers the complete development of the platform as described in this proposal.

Deliverable	Effort	Cost (INR)
Customer App (Android) — React Native	Full Build	₹55,000
Technician / Rider App (Android) — React Native	Full Build	₹45,000
Admin Panel (Web) — with Store & Distribution Modules	Full Build	₹90,000
Backend API & Database (Node.js + DB)	Full Build	₹45,000
Real-time Tracking & Notifications	Included	₹15,000
Payment Gateway Integration (Razorpay)	Included	Included
Total Project Investment		₹2,50,000

Note: Server/hosting costs, third-party API charges (Google Maps, SMS), and app store publishing fees are not included in the above and are the client's responsibility.

6. Payment Schedule

Milestone	Percentage	Amount (INR)
Milestone 1 — Agreement Signing	20%	₹50,000
Milestone 2 — Figma / UI Design Approval	15%	₹37,500

Milestone	Percentage	Amount (INR)
Milestone 3 — Frontend Completion	35%	₹87,500
Milestone 4 — Backend Completion	20%	₹50,000
Milestone 5 — Final Delivery & Handover	10%	₹25,000

7. Project Timeline

The estimated project timeline is 2–3 months from the date of project kickoff and design approval. A detailed phase-wise breakdown will be shared after project commencement.

8. Post-Delivery Support

Sowsi Technologies Pvt Ltd provides 1 year of free maintenance after project delivery. This includes bug fixes, minor adjustments, and support for issues directly related to the delivered application.

Maintenance coverage includes: bug fixes in delivered functionality, minor UI adjustments, API integration issues, and technical support via email and WhatsApp. New features or module additions beyond the agreed scope are treated as separate engagements.

9. Client Responsibilities

Responsibility	Details
Cloud Hosting & Server	AWS, DigitalOcean, or equivalent — setup and billing by client
Google Maps API Key	Required for live tracking and navigation features
SMS/OTP Gateway	Msg91, Twilio, or equivalent — account and billing by client
Firebase Account	For push notifications — Google account required
Payment Gateway Account	Razorpay merchant account activation and KYC
App Store Publishing	Google Play Developer account (₹2,500 one-time fee by client)
Visual Assets & Branding	Company logo, product images, and brand content to be provided by client
Feedback & Approvals	Timely review of designs and builds to avoid project delays

10. Future Enhancements

The following capabilities are not part of the current scope but can be planned as a future phase after successful delivery of the core platform:

Manufacturing & Production Portal (raw material management, batch tracking, quality control), advanced State & District Distributor dashboards, social media campaign management integration, and a dedicated Customer Support Ticketing system.

Detailed scoping, timelines, and investment for future phases will be discussed and quoted after the current phase is delivered.

11. Why Sowsi Technologies Pvt Ltd

Strength	What It Means for You
Made in India	Built by an Indian team that understands local business workflows, payment systems, and user behaviour
Full Ownership	You receive 100% source code and intellectual property rights upon project completion
Modern Tech Stack	React Native, React.js, and Node.js — proven, scalable technologies used by leading platforms
Extended Support	1 year of free post-delivery maintenance — we stay available well beyond handover
Transparent Process	Milestone-based payments with regular demos — you always know exactly where your project stands

12. Next Steps

Step	Action
01	Review this proposal and share any questions or clarifications needed
02	Confirm project scope and proceed to agreement signing
03	Initial payment (20%) to be processed upon agreement signing
04	Project kickoff — UI/UX design phase begins within 3 working days

To proceed or for any queries, please reach us at info@sowsitechnologies.com or on WhatsApp. We look forward to building this platform with you.
